

CHONTHICHA TADTHONG

SUMMARY

Full-stack Web Developer experienced in building and maintaining web applications across frontend, backend, and databases. Skilled in developing internal systems and digital solutions that help streamline workflows and improve operational efficiency.

EXPERIENCE

Programmer

June 2024 – Present

Kasemrad Pathum Thani Hospital, Thailand

Responsibilities

- Developed and maintained full-stack web applications for hospital operations using PHP, Laravel, JavaScript, Vue.js, HTML, CSS, Bootstrap, and MySQL.
- Designed and implemented end-to-end systems, including system architecture, database design, frontend interfaces, and backend services.
- Transformed manual and paper-based workflows into digital web applications, improving hospital operational efficiency.
- Designed database structures and optimized data management processes for hospital information systems.
- Maintained and managed hospital databases, ensuring data integrity, accuracy, and system reliability.
- Collaborated with multiple hospital departments to gather requirements, analyze workflows, and develop tailored internal systems.

UX/UI Design Intern

Nov 2023 – May 2024

Pharmacy Council of Thailand – Ministry of Public Health

Telehealth Thailand Project

Responsibilities

- Designed the telehealth consultation feature, defining the complete user flow from consultation entry to patient-doctor interaction.
- Created user flows, wireframes, and interface structures for the online consultation system.
- Designed UX/UI screens and interaction workflows to improve the usability of the consultation process.
- Collaborated with Business and Marketing teams to gather and analyze system requirements.
- Worked closely with the development team to support implementation of the feature on both front-end and back-end systems.
- Assisted in translating system requirements into functional interface designs for the development team.
